

# Quarters

If you split a shape into  equal pieces,  
each piece is called a **quarter**.

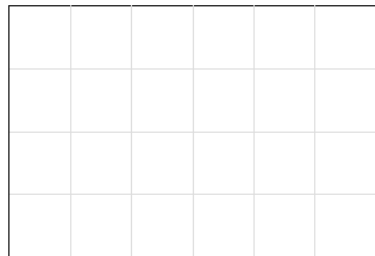

This shows a **circle**  
divided into  quarters.

This shows a **rectangle**  
split into  quarters.

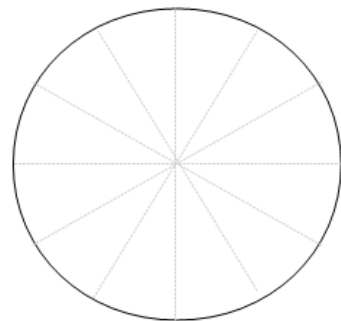

**One quarter** of this rectangle  
is **shaded**.

You **write** this as  .

**Three quarters** of this circle  
are **shaded**.

You **write** this as  .
